Profile

Data Scientist and Machine Learning Enthusiast with hands-on internship experience and a strong interest in building data-driven solutions.

Professional Experience

Anti-Fraud Intern | Fino payment bank

Duration : 2 months

- Reviewed and verified transaction records .
- Prepared and maintained reports using excel

Projects :

Face Recognition

The objective of this project is to use face recognition for door security.

Most doors are controlled by persons with the use of keys, security cards, password or pattern to open the door. The purpose of building this kind of system for improvement of the door security of sensitive locations by using face detection and recognition.

The Database used in the project was [Kaggle](#)

Custom CNN model and transfer learning algorithm was used during this project.

Companies Data was used to create this project.

AI Image Caption Generator:

Tech Stack: Python, Deep Learning, TensorFlow/Keras, CNN, NLP

Built a deep learning-based system to generate captions from images automatically.

Combined Computer Vision and Natural Language Processing techniques.

Performed image preprocessing, feature extraction, and caption generation.

Developed and tested the complete model pipeline using Python.

Improved understanding of deep learning, image processing, and NLP concepts

Skills :

Programming languages :

Python

Python libraries: Numpy, pandas,seaborn,matplotlib

Deep learning algorithms :

ANN, CNN, RNN

Database

Excel

Machine learning algorithms :

Linear regression, Logistic regression, Decision tree, Random forest, XGBoost , Unsupervised learning

Computer Vision :

Image Classification, Object Detection, Image Segmentation, OpenCV

Frameworks

Tensorflow, PyTorch

Education

B.sc in Data Science (Pursing) | SiWS college, Mumbai |
